

The National Sword in China has imposed strict restrictions on scrap paper & plastic imports.

This has had a significant impact on North American access to recycling markets. Municipalities' markets and pricing for recyclable materials have also been impacted by new, and currently unattainable, quality standards.

As a result, the recycling program in Morinville will see changes **effective January 1, 2019**.

Items such as glass bottles and jars, single serve 'to-go' coffee cups, styrofoam, some plastics and clamshell containers will **no longer be accepted nor collected in the Blue Bag Recycling stream**. Those items will be required to be disposed of primarily in your waste cart or at a recycling facility.

To learn more about what is accepted in the Blue Bag Recycling and what to do in the event that your blue bag is not picked up, please go to  
[www.morinville.ca/services/waste-management](http://www.morinville.ca/services/waste-management).

You can also use our "Where Does It Go?" section or play our Waste Sorting Game through our website.
